

Round tube laser cutting machine

Short Description

P120 Professional fiber laser round tube cutting machine is special for processing round tube type pipes. With many advantages, this product is gradually replacing the traditional sawing machine, wire-cutting machine and punch machine, and becoming the new main round tube processing equipment.

Main Technical Parameters

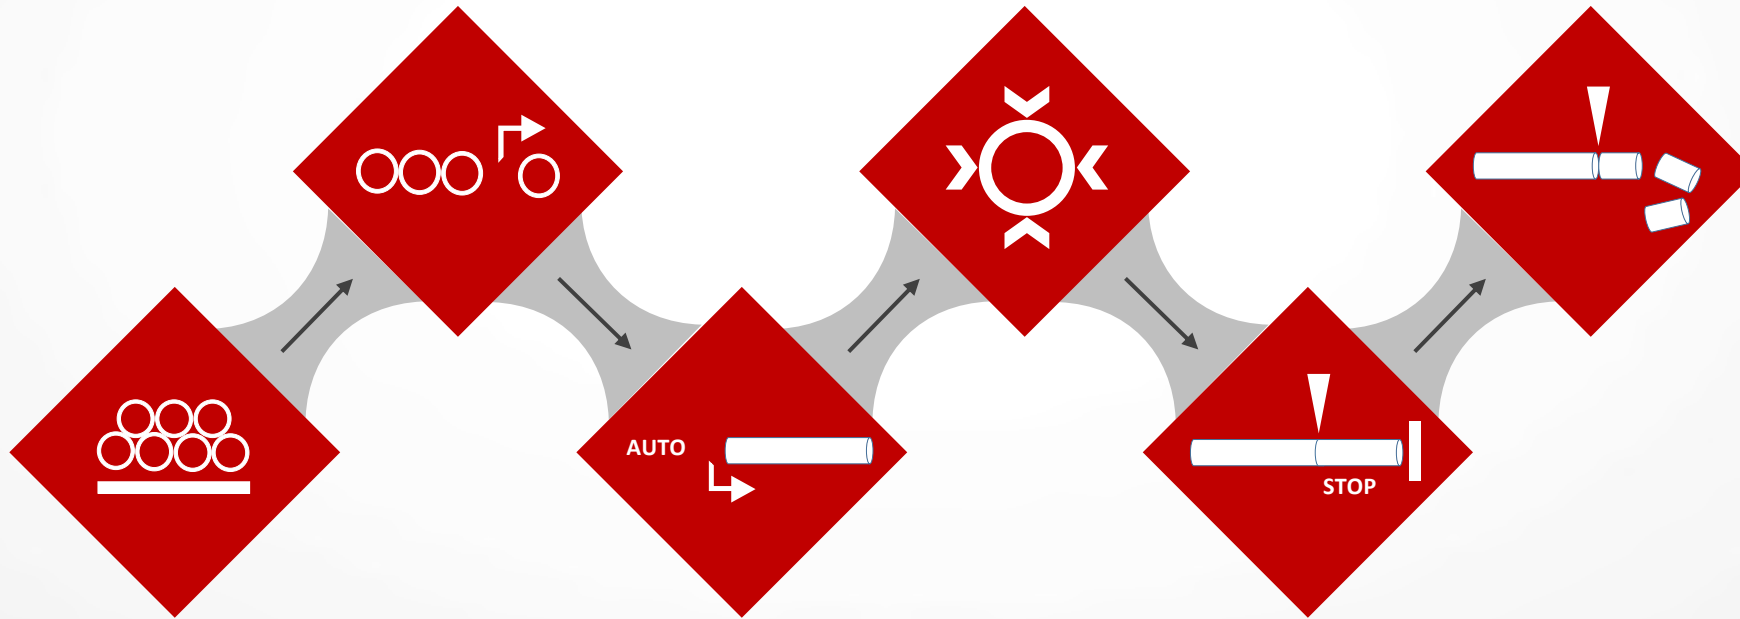

Wrok process

Round tube distribution

Quick clamping

Automatic continuous cutting,
beveling and punching

Bundle round tube feeding

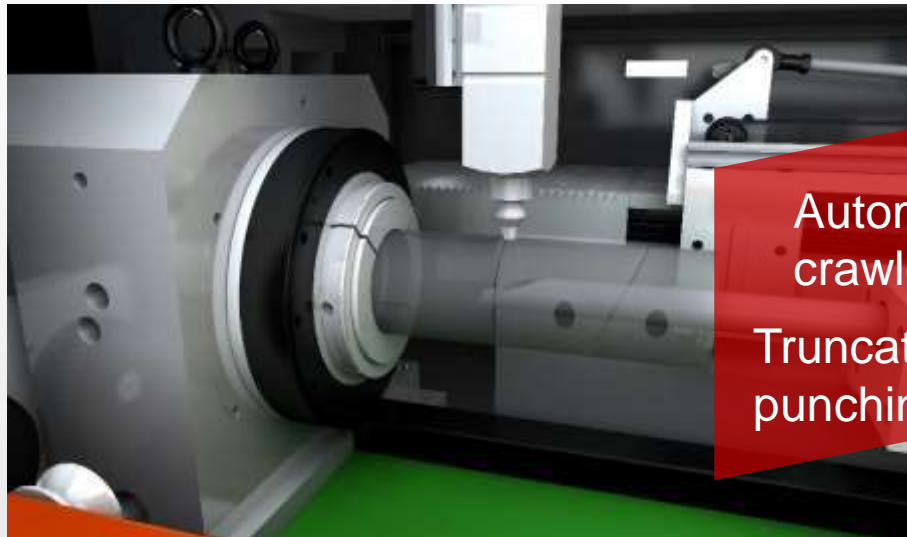

Automatic feeding of round tube

Automatic length positioning

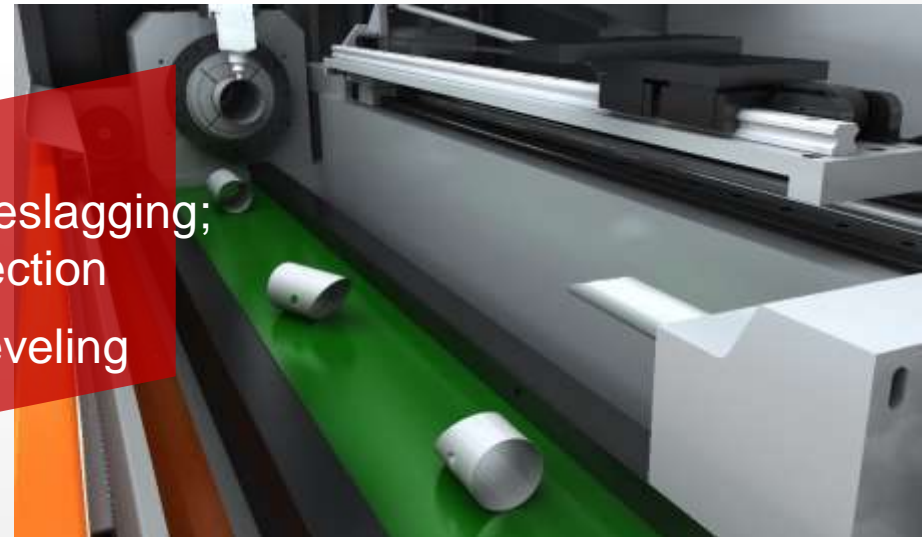

Machine Features

Automatic feeding
Automatic batch feeding
of round tubes

Automatic deslagging;
crawler collection
Truncating, beveling
punching

Application
